

KEYGENE'S TECHNOLOGY PLATFORMS

Lead Discovery & Validation

Molecular Mutagenesis

Accelerated Molecular Breeding

KEYGENE'S TRAIT PLATFORMS

- ⇒ Biotic stress resistances
- ⇒ Abiotic stress resistances

- ⇒ Herbicide tolerances
- ⇒ Reproduction traits

Added value in improved 6F crops

Sustainable molecular genetic responses to the world's needs for yield stability, quality and health of 6F crops.

It's a Green Gene Revolution

in US: Rockville Innovation Centre – Suite 405, 155 Gibbs Street, Rockville, MD 20850, T +1 240 205 7083, E mark.van-haaren@keygene.com

outside US: Agro Business Park 90, 6708 PW Wageningen, The Netherlands, T +31 (0)317 466 866, E herco.van-liere@keygene.com or www.keygene.com

Traits & Technologies

To accelerate your breeding programs, KeyGene deploys its unique and proprietary technology platforms for trait applications.

KeyGene understands your business and your market and helps you with the creation of competitive advantages. So, join our *Green Gene Revolution* approach to explore and exploit existing and induced natural genetic variation in your 6F crops (food, feed, fiber, fuel, flowers and fun crops).
